

# FidesGov. The whole city runs on hardware you own.

Five sovereign software platforms for small cities and public safety, each running on local hardware the city controls. No cloud tax, no recurring API bills, no citizen data leaving the building. Enterprise grade, sized for a town budget.

<b>5</b> PLATFORMS, ONE SUITE	<b>0</b> DATA ON SHARED CLOUD	<b>25</b> YEARS, 15 COUNTRIES	<b>100%</b> LOCAL DATA SOVEREIGNTY
----------------------------------	----------------------------------	----------------------------------	---------------------------------------

## THE SUITE

### Five platforms that solve the daily reality of running a small city

<p><b>FidesGov Desk</b> <span style="float: right;">MAYOR, PUBLIC WORKS, CODE</span></p> <p><b>Residents chase answers across email, phone, social, and walk ins.</b></p> <p>One front door for every request. It captures, sorts, and routes complaints, permits, and inquiries automatically, on a tell us once model.</p> <p><b>Cuts the administrative backlog</b></p>	<p><b>FidesGov InterOps</b> <span style="float: right;">FIRE, POLICE, EMS</span></p> <p><b>In an emergency, dispatch loses minutes jumping between radios and systems.</b></p> <p>One secure dashboard that ties every agency into a single live picture of traffic, asset locations, and status. It keeps working even if the internet grid goes down.</p> <p><b>Drives down response time</b></p>
<p><b>FidesGov Fleet</b> <span style="float: right;">FIRE, POLICE, PUBLIC WORKS</span></p> <p><b>Expensive vehicles break down early and retire before their time.</b></p> <p>Predictive maintenance that treats the fleet like a precision line. It schedules service before failures and dispatches assets on real demand.</p> <p><b>Extends capital asset life</b></p>	<p><b>FidesGov Inspect</b> <span style="float: right;">FIRE MARSHAL, PERMITTING</span></p> <p><b>Inspections crawl on paper, with the same data keyed in twice.</b></p> <p>A field tool that closes an inspection on site. Log the violation, snap the photo, fire the fee and the official notice, all written straight to the property record.</p> <p><b>Speeds inspection turnaround</b></p>
<p><b>FidesGov Shield</b> <span style="float: right;">IT ADMIN, POLICE RECORDS</span></p> <p><b>Small cities are the favorite ransomware target because they rarely have a full time security team.</b></p> <p>An autonomous, always on defense center that monitors the network, isolates threats, and keeps immutable local backups. Zero trust architecture keeps police and financial records off shared cloud entirely.</p> <p><b>Protects uptime and citizen data</b></p>	

## THE TECHFIDES EDGE

### Why local first wins for a city

- **Data sovereignty.** Tax files, IDs, and police records stay inside the city, on hardware you own.
- **No cloud tax.** One system you own, with no per seat fees that climb every renewal.
- **Always on.** Public safety tools keep running through an internet or cloud outage.
- **Clean compliance, less overhead.** Data that never leaves the building makes the audit simple, with no complex training or unbudgeted infrastructure surprises.

## PRICING BY SIZE AND SCOPE

### One clear ladder, per platform

<b>Municipality</b> <span style="background-color: #007bff; color: white; padding: 2px;">ENTRY</span>	<b>from \$25,000</b> \$1,500 / mo support
<b>Regional or County</b>	<b>from \$95,000</b> \$1,500 / mo support
<b>National or State</b>	<b>up to \$175,000</b> \$1,500 / mo support

Pricing is per platform and scales with deployment size. Bundle two or more platforms for a suite engagement. Pilots available.

LEGAL NAME	UEI	CAGE CODE	HEADQUARTERS	CAPABILITY STATEMENTS
TechFides LLC	C1LTZ96RCU19	9ADF9	Frisco, Texas	Government and Commercial

NAICS: 541611 Management Consulting | 541512 Computer Systems Design | 541511 Custom Programming | 541519 Other IT Services | 518210 Data Processing and Hosting | 541513 Facilities Management

### Start with one platform and one pilot.

Pick the pain that costs your city the most this year. We scope a pilot, deploy on hardware you own, and prove the return before you scale to the full suite.
